

Hall 6-7 is a versatile, multi-purpose space with direct access from the central hall, as well as a private outside entrance. The ceiling structure offers a wide range of possibilities for hanging and partitioning the area, allowing for flexible use of the space. A comprehensive network of channels facilitates the installation of electrical, water, and IT systems to suit a variety of needs. The hall regularly hosts general meetings, exhibitions, sport events, and corporate parties. Ideally situated at the heart of the main building, Hall 6-7 is easily interconnected with Hall 1 as well as the Sydney and Seoul conference rooms, allowing conferences and exhibitions to be combined on one floor. On the second floor, the Turin and London conference rooms offer uninterrupted views of the hall and are frequently used as technical control rooms or steering offices for events hosted in Hall 6-7.

Convention Centre
Level 1

FEATURES

Level	1
Total usable area	5000 m ²
Height	7 m - 11 m
Floor covering	Concrete
