

The Londres room consists of four versatile modules of varying sizes (AB, ABC, ABCD) which can be used independently or combined, making it ideal for conferences, workshops or even exams. The modules can be tailored to meet your specific technical and layout requirements. Each room is equipped with fixed, interconnectable projection systems, enabling a seamless transition from one large space to four individual modules on the same day. This space also makes the perfect breakout room for conferences or corporate events.
