

The Seoul Room is directly accessible from the central hall and features a dedicated loading bay. With its vitrified solid oak parquet flooring, it's perfectly suited for hosting conferences, exhibitions or receptions. A rail system with movable partitions allows the adjoining space to be adjusted to suit the specific needs of each event. Hall 1 also includes a second modular space that can be created by a separate set of mobile walls —the Sydney Room— accommodating between 490 and 860 guests.

FEATURES

Level	1
Total usable area	260 m ²
Height	3.8 m
